(54) Title: AIR CLEANER

(57) Abstract: The present invention relates to an air cleaner capable of quickly cleaning air in a larger area in an improved air circulation construction in which a body of an air cleaner is formed in a cylindrical shape, and air is sucked through an entire surface of a cylindrical body, and the sucked air is passed through a cylindrical filter and a cleaning unit, and the cleaned air is discharged in an upward direction, and in addition it is possible to prevent inlet air and outlet air from being mixed each other for thereby achieving an effective cleaning operation.
